Timestamp:	2026-03-23 12:45:03
Location:	Mumbai - Central Station Feed
Disaster Type:	FLOOD
Severity:	HIGH
Confidence:	98.0%

OFFICIAL NDMA SAFETY PROTOCOLS

Based on the provided NDMA documents, the immediate safety steps for a flood are: **Evacuate to higher ground**: Move to higher ground or elevated areas to avoid floodwaters. **Stay away from floodwaters**: Avoid contact with floodwaters, as they can be contaminated with sewage, chemicals, and other hazards. **Follow evacuation orders**: If ordered to evacuate, do so promptly and follow the recommended evacuation route. **Stay informed**: Monitor local news and emergency alerts for updates on the flood situation and evacuation instructions. **Protect yourself from electrical hazards**: Avoid downed power lines, electrical outlets, and other electrical hazards. **Be prepared for power outages**: Have a flashlight, battery-powered radio, and other essential items in case of a power outage. **Follow proper hygiene practices**: Wash your hands frequently, use boiled or chlorinated water, and cook food safely to prevent waterborne illnesses. **Be aware of potential health risks**: Be aware of the potential for waterborne illnesses, such as cholera, dysentery, and typhoid fever. **Stay safe during rescue operations**: If you need to be rescued, stay calm and follow the instructions of rescue personnel. **Follow medical guidance**: If you are injured or ill, seek medical attention promptly and follow the guidance of medical professionals.
